

2024 Field Trip to Chung-Tai Resource Tech

✧ Purpose

The field trip is to deepen exchanges with countries in the New Southbound Policy. Participants will gain and learn about Taiwan's actual experiences in environmental sustainability, green building, energy efficiency, ecological conservation, and related solutions and strategies. By connecting Taiwan's environmental protection field with international talents, this activity will promote mutual exchange and cooperation in environmental protection.

✧ Information

The Chung-Tai Resource Tech was established in 2001 and dedicated running mercury containing waste, waste lighting and waste PCB recycling business and extended their market reach to waste incineration in 2022. They continue to innovate and develop circular economy solutions for materialization and Waste-to-Energy (WtE). It aims to promote Taiwan's world leading green technology and contribute to global protection.

✧ Event

In this field trip, a lecturer(s) will provide in-depth explanations of the solutions for materialization and Waste-to-Energy. Participants will also watch some informative videos and go on an on-site visit to the Chung-Tai Resource Tech factory, In the end, a small-scale discussion will be held for participants to ask questions and exchange opinions on Waste-to-Energy topic.
