

# ***National Taipei University***

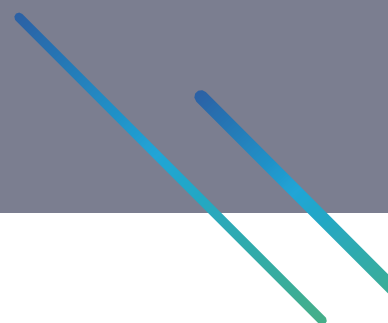

# ***Welcome***

## ***Message from the President***

Prof. Daw-Tung Lin

Welcome to  
National Taipei  
University

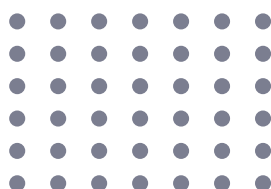

Rooted in law, business, economics, the humanities, and the social sciences, National Taipei University actively fosters innovation across technology and interdisciplinary fields. Our mission is to cultivate students with critical thinking, creativity, and a global perspective. At National Taipei University, we value not only academic rigor but also character development, interdisciplinary learning, and social responsibility. Over the past five years, our incoming students' average admission scores have ranked among the top 3% nationwide, reflecting the high quality and consistent performance of our student body.

Here, every student has the opportunity to explore their interests, develop their potential, and learn to navigate a rapidly changing world through diverse courses and practical experiences. Whether in technology applications, AI empowerment, digital transformation, or sustainability and social service, we encourage our students to embrace challenges, create value, and become leaders of the future. Notably, our students have demonstrated excellence through professional certifications and achievements, including ranking 2nd in the "Most Loved Universities in Law and Politics" by Commonwealth Magazine in 2023, 3rd in Business and Law in 2024, and 7th in Humanities and Social Sciences nationwide, reflecting recognition from both society and industry. National Taipei University values the growth and exploration of knowledge by all faculty and students. We hope that each day here inspires learning and personal development, and we look forward to sharing wisdom and creating the future together.

Once again, welcome to join the learning and discovery journey at National Taipei University!

# ***History of National Taipei University***

• • • • •

## 1949 – 1955

### Taiwan Provincial College of Public Administration

Founded in 1949, the Taiwan Provincial College of Public Administration was established in Taipei City with a paramount mission: to address the educational needs of college students compelled to halt their studies due to the relocation of the National Government to Taiwan. In addition to this crucial role, the institution was entrusted with the vital task of training administrative personnel. These individuals were to play pivotal roles at various levels of civil service, contributing to the development of a self-reliant and resilient local government.

## 1955 – 1961

### Taiwan Provincial College of Law and Business

In 1955, the Taiwan Provincial College of Law and Business emerged through the amalgamation of two public administration colleges. This institution introduced comprehensive four-year programs encompassing fields such as judicial administration (later rebranded as public administration), law, land administration, sociology, finance (eventually renamed economics), industrial management (later titled business management), and cooperative banking. This strategic consolidation aimed to provide students with a well-rounded education, preparing them for diverse careers in these essential disciplines.

# **History of National Taipei University**

● ● ● ● ●

## 1961 – 1971

College of Law and Business,  
Taiwan Provincial Chung-Hsing University

In July 1961, a significant development unfolded as the Taiwan Provincial College of Law and Business joined forces with the Taiwan Provincial College of Agriculture, giving rise to the establishment of Taiwan Provincial Chung-Hsing University. The main campus of the university found its home in Taichung City, while the College of Law and Business retained its original location in Taipei. This strategic merger aimed to enhance the university's academic breadth and strengthen its overall impact, with the College of Law and Business maintaining its distinct identity and presence in the capital city.

## 1971 – 2000

College of Law and Business,  
National Chung-Hsing University

In August 1971, a transformative rebranding marked the official renaming of Taiwan Provincial Chung-Hsing University to National Chung-Hsing University, ushering in a new era of comprehensive national education and sustained growth in both size and reputation. A pivotal development unfolded in 1989 when the Ministry of Education endorsed a relocation proposal for the College of Law and Business to Sanxia in New Taipei City, a plan that received approval in 1992, with the preparatory office commencing operations in 1993. Throughout this transformative period, the university's ambitious development plans received unwavering support from dedicated alumni and the local community.

# History of National Taipei University

● ● ● ● ●

The year 2000 witnessed a significant milestone as the College of Law and Business evolved into what is now recognized as National Taipei University, encompassing both the original Taipei campus and the newly established Sanxia campus. This transition underscored the university's commitment to providing a diverse and enriched educational experience across different locales, solidifying its status as a dynamic and forward-looking institution.

## 2000 - National Taipei University

"A great city should have a great university!"

Nestled within an expansive 54-hectare space, the Sanxia Campus of National Taipei University stands as a pioneering model of a "college town" – the first of its kind in Taiwan. The university is unwavering in its commitment to merging the benefits of innovative education, a result of years dedicated to teaching excellence programs. In a significant move in February 2011, NTPU established the "United Taipei University System," fostering collaboration with institutions such as National Taipei University of Technology, National Taiwan Ocean University, and Taipei Medical University. Beyond its local impact, the university has cultivated a global presence through extensive international partnerships, emphasizing a comprehensive and globally connected educational experience for its students.

## Our Alumni

Since its founding in 1949, National Taipei University has nurtured countless outstanding talents. Our alumni have excelled in academic research, business management, public service, and social contribution—demonstrating not only exceptional professional competence but also the university's core spirit of pursuing truth and serving society.

To date, more than 100,000 alumni have graduated from NTPU, leaving a lasting impact across the public, private, and academic sectors. They have made significant contributions to Taiwan's political, economic, and social development, while also bringing the "Taiwan experience" onto the global stage through their achievements and influence.

NTPU's alumni associations span the globe, including chapters in the United States, Thailand, Hong Kong, Myanmar, Malaysia, Australia, Macau, and Vietnam. These associations foster strong bonds among alumni across continents and serve as an important platform for overseas graduates to stay connected with—and continue supporting—their alma mater.

▼ Outstanding Alumni Awards

# ***University Administration and Teaching Quality Assurance***

## Education and Professional Accreditation

- College of Business accredited by the Association to Advance Collegiate Schools of Business (AACSB) (since 2016)
- Department of Accountancy accredited by CPA Australia, Accredited Chartered Certified Accountants (ACCA) Program (2017–18)
- Department of Real Estate and Built Environment accredited by the Royal Institution of Chartered Surveyors (RICS)
- Departments under the College of Electrical Engineering and Computer Science accredited by the Institute of Engineering Education Taiwan (IEET) (since 2010)
- Partnered with Amazon Web Services (AWS) to establish the Virtual Cloud Innovation Academy, providing faculty and students with free access to AWS resources for cloud-related skill development.

## Societal Satisfaction and Academic Reputation

- In the 2024 Global Views Monthly University Rankings:
  - Ranked No. 3 in Taiwan in Business, Management, and Law.
  - Ranked No. 5 among national public universities and No. 7 overall in Taiwan in Humanities and Social Sciences.
- In the 2024 1111 Job Bank “Most Favored Universities by Employers” Rankings, placed No. 10 among national public universities.
- In the 2024 Cheers Magazine “Most Favored Graduates by Enterprises” Survey, placed No. 10 among national public universities.

## World Rankings

- Ranked 401–600 globally in the Times Higher Education (THE) Impact Rankings in both 2022 and 2023, placing 14th among all universities in Taiwan.
  - SDG16: Ranked No. 1 in Taiwan (2021), No. 2 in Taiwan (2023).
  - SDG2: Ranked No. 2 in Taiwan (2021).
  - SDG11 & SDG15: Ranked No. 3 in Taiwan (2022).

# ***University System of Taipei: Inter-mural Alliances, Sharing of Learning Resources***

NTPU has established the "University System of Taipei" in collaboration with National Taipei University of Technology, Taipei Medical University, and National Taiwan Ocean University. Each university within this alliance boasts unique strengths and accomplishments in their respective domains. The formation of the University System of Taipei has facilitated the pooling of teaching and research resources among the four institutions, capitalizing on synergies and enhancing the sharing of educational assets. Beyond offering opportunities for minors and double majors, the collaboration has led to the introduction of interdisciplinary academic programs, such as the "Innovation Industry Management Bachelor Academic Program," "Medicine, Technology and Law Bachelor Academic Program," and "Cultural Creative Industry Management Marketing Bachelor Academic Program," broadening students' educational horizons.

## ***The Principles of National Taipei University***

National Taipei University is guided by the vision of "Pursuing the truth and serving the people." Our commitment extends beyond education as we emphasize to both students and faculty the importance of not only acquiring knowledge but also applying it in practical settings. Aligned with our curriculum and extracurricular initiatives, faculty members guide students in undertaking internships and engaging in services across diverse fields. This hands-on experience allows students to witness the real-world impact of their learning. Collaborative efforts with alumni, domestic and international industries, organizations, and schools provide our faculty and students with opportunities to broaden their horizons and minds, fostering a dynamic and enriching educational environment.

# Faculty Research Achievements: Rising to the World's Top Scientists

## World's Top **2%** Scientists

In September 2025, a total of eight faculty members from NTPU were recognized on the "World's Top 2% Scientists" list, published by Stanford University in collaboration with Elsevier. Among them, Vice President Yu-Shan Chen of the Department of Business Administration ranked 607th globally and 3rd in Taiwan on the annual impact list, demonstrating outstanding achievement.

Seven of the eight faculty members have been recognized in consecutive years, highlighting the sustained international impact and outstanding research achievements of NTPU faculty.

The honorees are:

- President Daw-Tung Lin – Department of Computer Science and Information Engineering
- Chair Professor Gwo-Hshiung Tzeng – Graduate Institute of Urban Planning
- Vice President Yu-Shan Chen – Department of Business Administration
- Distinguished Professor Kuen-Hung Tsai – Department of Business Administration
- R&D Director Yuh-Shyan Chen – Department of Computer Science and Information Engineering
- Distinguished Professor Colin C.J. Cheng – Department of Business Administration
- Professor Kuei-Hsien Liao – Graduate Institute of Urban Planning
- Associate Professor Chung-Yi Li – Department of Communication Engineering

# ***Faculty Research Achievements: Rising to the World's Top Scientists***

## Innovative Research Achievements

- (1). Distinguished Professor Bor-Shing Lin (Department of Computer Science and Information Engineering)
  - “Intelligent Posture Detection System” – Gold Medal & ERIInet Innovation Award, 2025 Nuremberg International Invention Exhibition, Germany.
  - “Gait and Balance Monitoring System” – Gold Medal & Saudi Arabia Outstanding Innovation Award, 50th International Exhibition of Inventions, Geneva, Switzerland.
- (2). Professor Hsin-Lung Wu (Department of Computer Science and Information Engineering)
  - “AI Video Automatic Editing Technology” –Thailand Special Award, 2025 Nuremberg International Invention Exhibition, Germany.
- (3). Distinguished Professor Jia-Chuan Lin (Department of Electrical Engineering)
  - “Dual-Field and Dual-Flipped Teaching Model Applied to an All-English Large-Scale Integrated Circuit Technology Course: Expanding Learning Content and Enhancing Learning Effectiveness” – Outstanding Teaching Practice Research Project, Ministry of Education.
- (4). Dr. Thijs Velema, Department of Sociology
  - 2025 Ta-You Wu Memorial Award from the National Science and Technology Council.

# ***Sustainable Leadership and Social Impact at NTPU***

## **Sustainable Campus**

### **Promotion of Social Responsibility and Engagement with the Local Community**

The Ministry of Education in Taiwan has increasingly emphasized the social responsibility of higher education institutions. At National Taipei University, this commitment has been integral to our identity since our founding. We pioneered initiatives such as establishing the first night school and prioritizing continuing education, demonstrating our longstanding dedication to community service. Over the decades, students have actively contributed to society, including nearly fifty years of legal aid services and over thirty years of community land service. The planning and development of our Sanxia Campus marked a milestone, making NTPU the first university in Taiwan to integrate the concept of a “university town.” From campus planning to preserving local culture and investing in community services across all age groups, the university has maintained close ties with the surrounding community, fulfilling the vision that “where there is a university, there is hope.

## **2025 Taiwan Sustainable University Awards**

Since 2017, NTPU has collaborated with the Taiwan Institute for Sustainable Energy (TAISE) to advance university-wide sustainability initiatives. In 2018, NTPU became one of the first universities to publish a Sustainability Report. In 2023, the university further established the Office of Sustainability, led by the Vice President for Finance and Sustainable Development, to build a governance-driven and data-informed sustainability management framework.

In 2025, NTPU received the highest honors across three major categories—Overall Sustainability Performance, Sustainability Reporting, and Education Leadership—earning the titles of Taiwan Model University for Sustainability, Platinum Award for Sustainability Reporting, and Education Leadership Award for Sustainable Development. In addition, Professor Min-Chieh Tseng of the College of Social Sciences was recognized with the Outstanding Sustainability Professional Award, highlighting NTPU's forward-looking strategy and steady progress on its sustainability governance path.

# College of Law

Colleges of NTPU

National Taipei University

Established in 1952

The College of Law comprises:

- Department of Law
- Comparative Law Documentation (CCLD)
- Center for Energy, Environment and Human Society (CEEHS)
- Research Centers for Public Law, Civil Law Studies, Criminal Law, Center for Financial and Economic Law Studies, International Law, Fundamental Legal Studies and Labor and Employment Law.

As one of the longstanding legal institutions in Taiwan, the College of Law is dedicated to shaping students into lawyers with a versatile skill set in legal theories and practices, characterized by a profound respect for legal ethics and a compassionate concern for the underprivileged in society. In alignment with societal progress and change, the College of Law actively offers interdisciplinary courses, hosts international conferences, and promotes joint-degree and student exchange programs to instill a global perspective among all students.

# College of Business

Colleges of NTPU

## Academic Highlights

The College of Business received accreditation from the *Association to Advance Collegiate Schools of Business (AACSB)* in 2016, demonstrating its excellence in management education. The Department of Accounting has also obtained certification from the *Association of Chartered Certified Accountants (ACCA)*, enhancing professional practice and international competitiveness.

As an integral component of the University since its establishment in 1949

The College of Business builds upon the rich traditions set by the predecessors of the National Chung-Hsing University College of Law and Business. Reflecting the university's developmental history, the College offers a diverse range of disciplines. It encompasses:

- Department of Business Administration
- Department of Accountancy
- Department of Statistics
- Department of Finance and Cooperative Management
- Department of Leisure and Sport Management
- Graduate Institute of Information Management
- Graduate Institute of International Business
- EMBA in International Finance
- BA Program of Digital Marketing
- Center for e-Business Research
- Center for Cooperative Economics and Non-Profit Organizations
- Fintech and Green Finance Center
- Center for Corporate Sustainability

# College of Social Sciences

Colleges of NTPU

National Taipei University

## Academic Highlights

In the *2025 QS World University Rankings by Subject*, *Sociology* is ranked among *201–250 globally*, highlighting the college's research strength and international academic influence.

Established in 2000 during the transition from the College of Law and Business to National Chung-Hsing University

The College of Social Sciences comprises:

- Department of Sociology
- Department of Social Work
- Department of Economics
- Graduate School of Criminology
- Taiwan Development Center
- Center for Aging and Community

Fostering a seamless integration of theories, real case studies, and practical applications, the College of Social Sciences empowers students to apply their classroom learning effectively. Additionally, the College regularly organizes diverse seminars aimed at elevating academic standards and expanding the scope of intellectual exchange.

# College of Public Affairs

Colleges of NTPU

National Taipei University

## Academic Highlights

The Department of Real Estate and Built Environment has obtained international professional accreditations, including the *Royal Institution of Chartered Surveyors (RICS)* and the *Taiwan CPA (Certified Public Accountant) certification*, demonstrating the college's strength in professional education and adherence to international standards.

Established as a pioneering institution dedicated to the instruction and research on public affairs in Taiwan

The College of Public Affairs comprises:

- Department of Public Administration and Policy
- Department of Public Finance
- Department of Real Estate and Built Environment
- Graduate Institute of Urban Planning
- Graduate Institute of Natural Resources Management
- Research Center for Public Opinion and Election Studies
- Center for Land and Environmental Planning

The educational mission is centered on cultivating skilled human resources for public administration in Taiwan. Notably, alumni from the college have excelled in various government offices, earning high acclaim for their substantial contributions.

# College of Humanities

Colleges of NTPU

National Taipei University

Evolved from the Department of General Education within the College of Law and Business at National Chung-Hsing University

The College of Humanities comprises:

- Department of Chinese Literature
- Department of Foreign Languages and Applied Linguistics
- Department of History
- Graduate Institute of Folk Arts and Cultural Heritage
- Center for International Negotiations and Interpretation
- Center for Teacher Education
- Research Center for East-West Philosophy and Hermeneutics

Built upon a humanistic foundation, the College of Humanities integrates interdisciplinary knowledge and skills. Through collaborative initiatives that extend across national and institutional boundaries, the College is dedicated to nurturing teaching staff and outstanding professionals across all levels.

# College of Electrical Engineering and Computer Science

Colleges of NTPU

Established in 2007, the College of Electrical Engineering and Computer Science was founded in collaboration with the high-tech industries in the five northern science parks (Hsin-Tien, Chung-Ho, Tu-Cheng, Tao-Yuan, and Hsin-Chu) to address the growing demand for skilled and professional engineers and researchers.

The college encompasses various units, including:

- Department of Computer Science and Information Engineering
- Department of Communication Engineering
- Department of Electrical Engineering
- Prospective Research Center

In the era of rapid Internet technology advancement, internet applications, and mobile communication have seamlessly integrated into our daily lives. Presently, prominent research areas encompass 5G networks, the Internet of Things (IoT), and blockchain. The College of Electrical Engineering and Computer Science, founded on the fusion of networks and multimedia, is closely attuned to prevailing issues like 5G networks, IoT, blockchain, big data analytics, and artificial intelligence. This strategic alignment enables the College to conduct cutting-edge scientific research with enhanced competitiveness. Through strategic partnerships with current industries, our goal is to foster well-rounded professionals in electrical and communications engineering equipped with international perspectives and practical industry capabilities.

# International College of Sustainability Innovations

Colleges of NTPU

National Taipei University

Established in August 2019 as the seventh college of NTPU, the International College of Sustainability Innovations (ICSI) stands as a beacon for higher education. With fully English-taught courses, bolstered by NTPU's strong teaching capacity and a conducive learning environment, ICSI seeks to draw international students interested in pursuing advanced studies in Taiwan. Currently, ICSI offers three Master's programs and two Bachelor Programs. Additionally, the college has inaugurated a Chinese Center, offering Chinese language courses tailored to students' proficiency levels, thus increasing their efficacy in professional learning.

## The ICSI encompasses:

- MBA in Finance
- International Program on Urban Governance (IPUG)
- The Master Program in Smart Healthcare Management (SHM)
- The Bachelor Program in Innovative Teaching Chinese as a Second Language (ITCSL)
- The Bachelor's Program in Smart Sustainable Development and Management (SSDM)
- Chinese Language Center (CLC)

While the International College of Sustainability Innovations (ICSI) is the youngest college at National Taipei University, we are committed to fostering a warm and friendly learning environment, supported by integrated teaching and research resources. Our programs are designed to align with global changes and local circumstances, providing international students with a wide range of exceptional learning experiences.

# Research Centers

National Taipei University is committed to achieving academic excellence across a diverse array of disciplines and is driven by a commitment to continuous innovation and improvement. NTPU's research endeavors are particularly robust in the fields of law, business, public affairs, social sciences, humanities, and electronic engineering. Our research goals aim to pioneer interdisciplinary initiatives and make substantial contributions to society. The concurrent emphasis on teaching and research is foundational to National Taipei University, inspiring both faculty and students to generate innovative ideas spanning various colleges, departments, and interdisciplinary collaborations.

## Global Change and Sustainability Science Center

<https://cgcss.ntpu.edu.tw/en/index.php>

The Global Change and Sustainability Science Center (GCSSC) is dedicated to conducting research on critical issues such as global climate change, utilizing an interdisciplinary sustainability science approach. Comprising five divisions, namely (1) Resource and Environmental Governance, (2) Spatial Planning, (3) Global Environmental & Industrial Transformation, (4) Urbanization and Global Environmental Change, and (5) Disaster and Risk Management, GCSSC addresses various facets of sustainability challenges. Beyond research initiatives, GCSSC actively arranges international conferences and training workshops, fostering collaboration and scholarly exchange with global institutes.

## Research Center for Asia and Pan Pacific Region

<https://lms.ntpu.edu.tw/board.php?courseID=37970&f=doclist&folderID=169020>

This center fosters specific collaborative research projects, forums or academic conferences, joint publications, and the publication of research outcomes between our university and partner universities in the Asia-Pacific region. With a primary focus on economic and trade issues, the center prioritizes research in industrial economics, legal and political topics, and disaster management. To harness the integrative capabilities of the research group, the center actively promotes cross-national comparative research with a thematic orientation. The research scope spans mainland China, Japan, Southeast Asia, as well as the New Zealand and Australia regions.

## Public Finance and Finance Research Center

<https://www.pubfin.ntpu.edu.tw/about1.html>

In a bid to consolidate research endeavors in the financial and fiscal domains within the university and secure external research resources, the center is bifurcated into two research fields: "Fiscal" and "Financial." Its purview encompasses research, policy formulation, and educational training. The overarching goal is to elevate the academic research standards of the university, conform to international benchmarks, foster the internationalization of the university's research teams, and contribute to the overall development and global recognition of the institution.

## Center for HaiShan Research

<https://haishan.ntpu.edu.tw/>

Established in 2015, the Haishan Studies Research Center specializes in the collection and preservation of local cultural and historical materials, educational outreach, and academic research. It actively coordinates and promotes various educational, cultural, and research development initiatives. The center aims to provide a platform for mutual exchange among different teaching and research units within the university, fostering stronger interaction between the university and local cultural and historical research organizations in the Haishan region. The "Haishan Cultural Heritage Exhibition Hall," established in 2016 on the 6th floor of the NTPU Library, features physical exhibits covering themes such as historical evolution, early development and ethnic groups, traditional industries, urban and rural landscapes, historic sites and buildings, cultural and artistic spaces, and documents. Through well-curated displays, it showcases the developmental journey, settlement imagery, and cultural and historical landmarks of the Haishan region, serving as a space for planning various local cultural and artistic special exhibitions in the future.

## Research Center on Big Data and Smart City

<https://statlabntpu.wordpress.com/>

In light of the swift progress in information and communication technology, the center delves into issues surrounding the enhancement of urban intelligence, encompassing planning, construction, decision-making, management, and the delivery of quality services to citizens. Capitalizing on the university's diverse resources and research capabilities across multiple colleges, the center investigates topics including regional and urban development, innovation in public governance or management, transportation, housing, land policy, regulations, tourism and leisure, natural environmental resources, and sustainable growth. The center actively fosters integrated research within its groups and, guided by the principles of interdisciplinary governance, establishes collaborative models involving academia, research, government, and industry. This holistic approach enriches the depth of research content, ensuring that the outcomes can effectively contribute to practical applications.

# ***Student Support and Campus Facilities***

## **Library**

The library houses around 470,000 physical items, including books, audiovisual materials, electronic books, and over 170 print journals, as well as the university's theses, dissertations, and government publications. The library system also provides access to 149 online databases and nearly 60,000 electronic journals. Through partnerships with 25 libraries, including those in the Northern University Alliance, students can borrow and return materials from other campuses at no extra cost.

## **Sports and Recreation**

The campus features a wide range of sports and recreation facilities. Outdoor options include a track and field, soccer and baseball fields, tennis courts, basketball and volleyball courts. Indoor facilities include a 25-meter heated swimming pool, steam rooms, sauna, spa area, climbing wall, professional athlete training center, weight training room, multipurpose courts, and dance and fitness studios, providing opportunities for year-round physical activity.

## Clubs and Student Life

Participation in student clubs and organizations fosters leadership, teamwork, and problem-solving skills. The university hosts over 127 student organizations across seven categories: music, recreation, sports, arts, service, student government, and alumni networks. Clubs create platforms for building friendships, gaining practical experience, and personal growth outside the classroom.

## Student Counseling Center

The Counseling Center provides individual counseling, psychological assessments, group workshops, mental health programs, and psychiatric consultations. Support is also available for students with special needs, including assistive devices, academic tutoring, personalized learning accommodations, and scholarship guidance to enhance academic and personal success.

## On-Campus Work Opportunities

Administrative and academic offices hire student assistants each semester, with job postings announced on the university homepage. Work responsibilities vary by department, offering valuable professional experience alongside academic studies.

## Health Services

The Health Services team organizes wellness events and health lectures each semester, and provides free medical consultations for students and staff. In collaboration with En Chu Kong Hospital, specialist doctors offer on-campus consultations Monday through Friday from 2–4 PM in family medicine, orthopedics, thoracic medicine, internal medicine, and surgery.

## Student Housing

The Sanxia campus dormitories—Shining-Moon, Dawning-Sun, Glistening-Star and Glorious Morn buildings—surround the Roman Square, forming a vibrant residential community. Located by the Mind Lake, the dormitories offer scenic surroundings, natural light, ventilation, and privacy. Each room includes a private bathroom, balcony, internet access, and air conditioning. Shared facilities include lounge areas, table tennis rooms, and kitchens on some floors. Laundry facilities are available on every floor. The dormitory area is within a five-minute walk of classrooms, the gym, the MRT station, and the campus activity center.

# ***Internationalization at National Taipei University***

National Taipei University (NTPU) is committed to internationalization, driven by research excellence and a global outlook. The campus fosters academic exchange, expands the horizons of both faculty and students, and embraces the opportunities and challenges of globalization with creativity and initiative.

NTPU takes a comprehensive approach to internationalization. The university supports its academic and research units in understanding and integrating international perspectives into their work while welcoming outstanding international doctoral and degree-seeking students. NTPU actively engages in domestic and international research collaborations, including joint projects supported by Taiwan's Ministry of Science and Technology, the Ministry of Education's TEEP program, and European Union initiatives such as KA171 and KA131. Faculty members are encouraged to publish in international journals, collaborate across borders, and participate in global academic conferences, boosting the university's research profile and international visibility.

Supporting international students is a top priority at NTPU. The Office of International Affairs (OIA) plays a central role in ensuring that international students thrive academically, socially, and culturally. OIA manages orientation programs, mentorship initiatives, social events, and cultural activities, providing guidance and support to help students adapt smoothly to life in Taiwan. The office also coordinates student associations from diverse regions, offering peer networks, leadership opportunities, and community engagement, including fundraising for scholarships and emergency support. Activities such as social gatherings, cultural tours, and off-campus experiences allow international students to explore Taiwan, build connections, and fully engage with campus life.

Beyond student support, the OIA drives NTPU's global engagement strategy. It oversees study abroad programs, dual-degree initiatives, and short-term exchanges, creating opportunities for students to gain international experience and expand their academic and cultural horizons. By managing international partnerships, negotiating agreements, and implementing collaborative projects, the office ensures that faculty and students maximize the benefits of global collaboration. Each international exchange, internship, or partnership contributes to cultivating globally minded scholars and strengthening NTPU's presence on the world stage.
